

SAINT-GOBAIN INDEC

Global Competency Centre

About Saint-Gobain INDEC

Saint-Gobain INDEC (International IT Delivery Centre) is the global technology hub for Saint-Gobain - one of the world's leading sustainable construction and building materials companies, operating for over 360 years. Based in Mumbai, INDEC powers IT solutions for Saint-Gobain businesses across 75+ countries, covering enterprise applications, digital transformation, data & analytics, cybersecurity and infrastructure.

Joining INDEC means working on real, global-scale technology challenges with a structured career path, mentorship, and access to a global professional network.

Grade	M11
Designation	Associate Software Engineer
Location	Mumbai

Role Overview

As an Associate Software Engineer, you will work with diverse Saint-Gobain's businesses in 75+ countries. You will contribute to meaningful technology projects supported by a structured L&D programme and mentorship from senior team members.

Your stream allocation will be determined based on business requirements and your academic and technical background.

Business Service Lines

Joining stream will be assigned based on business needs.

STREAM	WHAT YOU WILL WORK ON
ERP	SAP implementation and support across modules - SD, FICO, SCM, PP, ABAP. Partnering with global business units on ERP transformation.
Digital Solutions	Application development using modern frameworks. Web, mobile and low-code platforms serving internal and external stakeholders.
Infrastructure & Cyber Security	IT infrastructure management, cloud operations, network and security. Monitoring, incident response and cybersecurity practices.
Digital Quality Assurance	Quality assurance across digital products - manual and automation testing, test planning, defect tracking and release validation.
Data & Analytics	Data engineering, business intelligence and analytics. Building dashboards, data pipelines and supporting data-driven decision making.
Enterprise Architecture & Integration	System integration, API management and enterprise architecture. Connecting applications and platforms across Saint-Gobain's global landscape.

Key Responsibilities

Technical Contribution

- Contribute to the design, development and delivery of technology solutions across your assigned stream.
- Write clean, maintainable and well-documented code or configurations.
- Support build, test and deployment activities as part of agile delivery teams.
- Assist in analyzing requirements and translating them into technical tasks.

Collaboration & Communication

- Work closely with senior engineers, architects and business analysts to understand project objectives.
- Participate in sprint ceremonies -standups, planning, reviews and retrospectives.
- Communicate progress, blockers and learnings to the team proactively.

Learning & Development

- Complete the structured L&D programme in your allocated stream
- Seeking mentorship from senior team members and apply learning to live project work.
- Stay updated on technology trends relevant to your stream.

Documentation & Quality

- Document work outputs include code, configurations, test cases and technical notes.
- Follow quality standards, coding guidelines and review processes set by the team.
- Contribute to knowledge-sharing within the team.

Qualification

- B.Tech / BE in Computer Science, Information Technology, Electronics & Communication, or a related engineering discipline.
- MCA (Master of Computer Applications).
- Consistent academic record - meeting organization eligibility criteria

Functional & Technical Competencies

COMPETENCY	WHAT WE LOOK FOR
Programming Fundamentals	Proficiency in at least one programming language -Java, Python, C++, JavaScript or similar. Ability to write logical, readable code.
Problem Solving	Structured approach to breaking down technical problems. Comfortable with data structures and algorithm concepts.
Database Basics	Understanding of relational databases and basic SQL - querying, joins and data retrieval.
Technology Awareness	Familiarity with concepts relevant to your area - cloud, ERP, analytics, security or integration — through coursework or projects.
Communication	Clear written and verbal communication. Ability to explain technical work to team members.

Behavioral Competencies

- Act As an Entrepreneur -Takes complete accountability to drive execution with a strong passion for delivering results.
- Innovate - Constantly looking for ways to innovate and envision new possibilities to enable continuous growth.
- Cultivating Customer Intimacy — Puts stakeholders at the core of decision making to build and nurture relationships.
- Being Agile - Displays willingness to win and is passionate about adding value to the organisation's success.
- Build An Open & Engaging Culture — Works collaboratively with others towards a shared organisational vision.
